

## **Environmental Policy**

Great Eagle Holdings Limited (the “Company”) strives to establish excellence in environmental responsibility. The Company is committed to managing and mitigating potential environmental risks in order to reduce its operating footprint throughout the Company and its subsidiaries (the “Group”).

The Environmental Policy (the “Policy”) demonstrates the Group’s commitment to sustainable development and responsible environmental stewardship. It is the Policy of the Group to:

- Comply fully with relevant environmental laws and regulations that have a significant impact on it;
- Reduce air and greenhouse gas emissions, discharge into water and land, and generation of hazardous and non-hazardous waste;
- Use all resources, including energy, water and other natural resources efficiently and conservatively;
- Identify and minimise all significant impacts on the environment and natural resources, including impacts on the biodiversity and natural habitat;
- Identify and mitigate significant climate-related issues which have impact, and those which may impact, the Group;
- Give priority to procure products and services that cause less harm and benefit more to the environment;
- Monitor and continuously improve the Group’s environmental performance of its operations;
- Provide training and resources necessary to meet the Group’s environmental responsibilities;
- Encourage the Group’s suppliers and contractors to make the same level of commitment to environmental protection.
